LED SCREENS

**PS - LED Floor**  
**HI-RES 4.8mm**

**Rave / Pro-Screens have added high resolution (4.8mm) LED Floors to their rental stock**

The LED floor can be used indoors or outdoors for all events including car launches. Apart from the actual cabinet high specs, it comes with special legs that can be adjusted to ensure an even floor without any gaps, even if the base is uneven!

All maintenance can easily be done from the top surface of the floor, meaning no need to dismantle all screen to change any faulty modules. The surface is professional Acrylic and each piece can take up to 700 kg.
